

## R5 Pedestrian Platform Truck

Great stability, 750kg capacity, 12m range with a full load on a single charge. Quick simple recharging. Comes with a 240V charger suitable for a domestic 3 pin plug. Approx 4hr charging time.

Can be left on charge overnight, charger has auto cut-off. Zero emissions, silent running and low maintenance.

Perfect for garden centres, agricultural applications, schools, colleges, hospitals, councils. Tough and reliable with large pneumatic tyres for rough terrain, it's built to withstand exposure to the elements. While silent, smooth running and zero emissions make it perfect for indoor use.

Safety features are standard. If the operator releases the handle, even on a slope the R5 range stops immediately. The tiller arm automatically returns to its upright position when released, triggering the automatic cut-off. This is also activated if contact is made with the red safety button at the end of the tiller arm.

### Vehicle Specification

<b>Power</b>	<i>Electric</i>
<b>Carrying Capacity</b>	<i>750 kg</i>
<b>Range</b>	<i>12 miles</i>
