The Essential Role of Mobile Lifters in Maintaining Workplace Safety

In today's fast-paced work environments, the emphasis on efficiency and productivity is ever-increasing. However, these goals must not come at the expense of worker safety. This is where mobile lifters, such as reel and roll trucks, lift and move trucks, and man-up lifts, play a crucial role. These versatile tools are essential for enhancing workplace safety and operational efficiency, providing significant benefits that go beyond simple load handling.

Reducing the Risk of Injury

One of the most compelling reasons to invest in mobile lifters is their ability to reduce the risk of injury among employees. Human bodies have inherent limitations when it comes to lifting and carrying heavy loads. Exceeding these limits can lead to a range of musculoskeletal injuries, including strains, sprains and even long-term conditions like chronic back pain. According to safety statistics, lifting injuries are among the most common workplace accidents, often resulting in significant downtime and medical expenses.

Mobile lifters help mitigate these risks by handling the heavy lifting, allowing workers to focus on tasks that are less physically demanding.

Enhancing Efficiency and Productivity

In addition to improving safety, mobile lifters significantly boost workplace efficiency. Manual lifting and carrying can be time-consuming and inefficient, particularly for tasks that involve frequent movement of goods or equipment. Mobile lifters streamline these processes by providing a quick and effective means of transporting items from one location to another.

Versatility and Adaptability

Another key advantage of mobile lifters is their versatility. These tools are designed to adapt to a variety of tasks and environments, making them valuable assets across different industries. Whether you need to move heavy reels, lift bulky items to high shelves, or transport goods across a warehouse floor, there's a mobile lifter tailored to your needs.

In Conclusion

Investing in mobile lifters is more than just a way to enhance operational efficiency—it's a crucial step toward prioritising the health and safety of your workforce. By reducing the physical strain on employees and minimising the risk of injury, these tools foster a safer, more productive work environment. Whether you need reel and roll trucks, lift and move trucks, or man-up lifts, our extensive range of mobile lifters offers solutions tailored to your specific needs.

New Vehicle

Pangea
Electric 4x4

The Ultimate Electric 4x4 Utility Vehicle

Experience the ideal combination of power, durability and eco-friendly operation with the Pangea range of electric 4x4 utility vehicles. These electric 4x4s are engineered to tackle even the toughest tasks while delivering a smooth and efficient ride. Whether you're working hard or exploring the great outdoors, the Pangea vehicles are your ultimate companions.

Efficiency Redefined

Unlock the potential of a new way to drive - one that is more versatile and eco-friendlier. Designed for those who demand both power and sustainability, the Pangea is the premier 4x4 electric utv as it combines rugged performance with environmental responsibility.

For those who crave adventure and need a dependable partner for off-road journeys, the Pangea electric 4x4 is your ideal match. Experience unmatched durability and efficiency with this electric utv 4x4 and transform your outdoor and work experiences.

Latest news

Sefton Council Invests in a Greener Future with New Electric Vehicles

We're proud to share that Sefton Council has added two new electric vehicles to their maintenance fleet, including the versatile EP AMP XL and the compact yet powerful EP 800!

These vehicles are perfect for supporting the Council's sustainability goals, while ensuring efficient and eco-friendly operations.

Thank you, Sefton Council, for choosing ePowerTrucks as part of your green journey. Together, we're making strides towards a cleaner, greener future.

Liverpool BID Invests in Sustainable Cleaning with New Electric Vehicle

We're excited to announce that Liverpool BID has added another Alke Electric Vehicle with a built-in pressure washer to their fleet!

This eco-friendly addition will help maintain the city while reducing emissions and noise, making it a perfect solution for urban cleaning and sustainability goals.

Thank you, Liverpool BID, for leading the way towards a greener, cleaner city!

Lift Safe Delivers Custom Solution to Major Snack Manufacturer

We are excited to announce the successful sale of an Armani Reel Truck Alfa Small 12V EVO to one of the largest snack manufacturers in the industry! This specialized reel truck is designed to streamline their material handling processes, providing a compact yet powerful solution for lifting and transporting reels with precision and ease.

The 12V EVO model offers advanced features, enhancing productivity and ensuring safe, efficient operations on the production floor. By incorporating this equipment into their workflow, the manufacturer can improve handling efficiency, reduce downtime, and boost overall safety standards.

Thank you for trusting Lift Safe with your material handling needs. We're proud to deliver tailored solutions that support operational success and look forward to continuing our partnership with this industry leader.

Meet the team

Bradley Woolley

AREA SALES MANAGER

We are pleased to highlight the growth and achievements of Bradley Woolley, who recently transitioned from the Parts Department to our Sales Team. Bradley joined our company three years ago, bringing dedication and a strong work ethic to every role he has taken on.

In his new position, Bradley is responsible for overseeing the sales of Glutton Vacuum products. His deep understanding of our products, combined with his drive to deliver exceptional service, has made him an invaluable asset to the sales team.

We look forward to seeing Bradley continue to excel in this new role, and we are confident that he will contribute to the ongoing success of the Glutton Vacuum brand.

Congratulations, Bradley, on this well-deserved promotion!

Product spotlight

Counterbalanced Floor Crane

01M5

This counterbalanced crane seamlessly embodies the marriage of efficiency and versatility, specifically designed for intricate lifting operations.

Featuring a manual hydraulic lift/lower jib arm, it allows for precise control over load placement. This capability is complemented by a manual push/pull mechanism, working in tandem with a hydraulic lever-controlled fast lift double-action pump to ensure swift and controlled lifting actions.

For meticulous handling, a fine control descent knob adds an extra layer of precision. The jib arm's unique feature is its 270-degree free rotation and five locking positions, which enable seamless and dynamic manoeuvring in any direction.

With a remarkable maximum safe working load (SWL) of 500kg, the equipment is well-suited for handling substantial loads with confidence.

Its manual jib extension capability further enhances adaptability, offering a standard extension of 860mm and the option for an extended jib arm reaching an impressive 1360mm.

Attaining a maximum lift height of 2804mm, it facilitates access to elevated areas with ease and efficiency.

Fixed front wheels contribute to steady movement, while rear rotating castors equipped with a reliable brake system provide precise mobility control.
